TOTAL TOUCH *WEB ORDERING*

Bringing Restaurants Online

START ACCEPTING ORDERS ONLINE

The fastest way to increase sales, broaden margins, boost efficiency and power your brand while reducing phone errors and wasted time.

NO HASSLE, NO CONTRACT, NO EXTRA CHARGES FOR MOBILE, NO RISKS

And nothing to worry about, we're so confident you'll benefit from our online ordering platform that if you decide you don't like it, simply cancel. You won't pay a penny more.

EASY TO SET UP, EASY TO LEARN, EASY TO MANAGE

Manage your store, menu and prices, business hours, coupons, discounts, alerts, feedback and more!

TOTAL TOUCH WEB ORDERING

Designed for customers who value their brand and recognize the importance of developing their own online integrated platform. It not only integrates with the restaurant's website but also provides a seamless view to the customer: DESKTOP / MOBILE. A customer can place an order on their desktop today, and tomorrow use the same account to place a new order while chatting with their friends. Next week, while riding the train, she can use her smart phone to place yet another order without having to sign-up all over again!

This integrated view is not limited to the customer. The simple and and easy to use control panel automatically updates information between DESKTOP / MOBILE! Example: Change the price of any item on your control panel and the adjusted price is automatically updated on DESKTOP / MOBILE. We believe in our products and services, not in contracts and long term commitments. If you like it, keep it! Otherwise, simply cancel!

TT TOTAL TOUCH®

SPECIFICATIONS
